

Press Release

Backyard Broadcasting Chooses Logitek

September 26, 2011, Houston, TX – Backyard Broadcasting's WKNI in Elmira, New York has ordered a Logitek Networked Console System composed of two JetStream Mini units and three ROC consoles.

The **JetStream Mini** AoIP platform is a dense 128-channel user-configurable audio node that handles all console functions as well as IP audio networking. Audio mixing, routing and processing along with 24 mix-minus busses are all contained in a single fanless, convection cooled two rack unit enclosure. Users can mix and match analog and digital I/O cards to create the ideal combination of sources and destinations including mics, CD players, studio monitors and more. Incorporating Logitek's JetNet network conduit, the JetStream permits direct network transfer of audio from hard disk playout systems and other Logitek JetNet partners without the use of sound cards.

Logitek's newest console, the **ROC**, brings easy operation and durable construction to an attractive desktop design. ROC consoles are available in multiples of 6 faders (up to 24) with a monitor module that includes controls for source selection, timer start / stop, two monitor feeds and headphone output. The monitor module also includes 12 user-assignable softkeys with LED illumination. High quality Penny & Giles® faders, OLED source indicators and more make the ROC both enjoyable and easy to use. Two sizes of meter bridges are available, along with Logitek's vScreen software application which allows the user to populate a VGA screen with meter banks, router controls and other information. Backyard Broadcasting ordered the ROC in three different sizes: 6, 12 and 18 faders.

About Logitek

Founded in 1979, Logitek Electronic Systems, Inc. designs and manufactures digital audio console, routing, switching and metering products for the broadcast and professional audio industries. Logitek Networked Console Systems are used in radio and television facilities worldwide. Full product information is available at the company's website: www.logitekaudio.com.
