

## Press Release

### Diversified Communications Chooses Logitek

October 28, 2011, Houston, TX – Diversified Communications' TV stations WABI-TV (Bangor, Maine) and WCJB-TV (Gainesville, Florida) have each ordered a JetStream Mini with an interface to the Ross Overdrive automated production control system. The JetStream Mini systems will use the Logitek vMix "virtual" console for control.

The **JetStream Mini** AoIP platform is a dense 128-channel user-configurable audio node that handles all console functions as well as IP audio networking. Audio mixing, routing and processing along with 24 mix-minus busses are all contained in a single fanless, convection cooled two rack unit enclosure. Users can mix and match analog and digital I/O cards to create the ideal combination of sources and destinations including mics, CD players, studio monitors and more. Incorporating Logitek's JetNet network conduit, the JetStream permits direct network transfer of audio from hard disk playout systems and other Logitek JetNet partners without the use of sound cards.

The Ross Overdrive is a production control system that enables touchscreen control over devices used in a production environment. It allows users to have fully automated, semi-automated or traditional manually controlled productions from the same control room.

#### **About Logitek**

Founded in 1979, Logitek Electronic Systems, Inc. designs and manufactures digital audio console, routing, switching and metering products for the broadcast and professional audio industries. Logitek Networked Console Systems are used in radio and television facilities worldwide. Full product information is available at the company's website: [www.logitekaudio.com](http://www.logitekaudio.com).
