

## Press Release

### KKDA Chooses Logitek

February 10, 2011, Houston, TX – KKDA in Grand Prairie, Texas is expanding its Logitek Networked Console System with the purchase of a JetStream Mini and a wiring package.

The **JetStream Mini** AoIP platform is a dense 128-channel user-configurable audio node that handles all console functions as well as IP audio networking. Audio mixing, routing and processing along with 24 mix-minus busses are all contained in a single fanless, convection cooled two rack unit enclosure. Users can mix and match analog and digital I/O cards to create the ideal combination of sources and destinations including mics, CD players, studio monitors and more. Incorporating Logitek's JetNet network conduit, the JetStream permits direct network transfer of audio from hard disk playout systems and other Logitek JetNet partners without the use of sound cards.

#### **About Logitek**

Founded in 1979, Logitek Electronic Systems, Inc. designs and manufactures digital audio console, routing, switching and metering products for the broadcast and professional audio industries. Logitek Networked Console Systems are used in radio and television facilities worldwide.
