

Press Release

WLTV Chooses Logitek

July 25, 2011, Houston, TX – WLTV (West Liberty University) in West Liberty, West Virginia has ordered a Logitek Networked Console System composed of a JetStream Mini and a Remora-16 console.

The **JetStream Mini** AoIP platform is a dense 128-channel user-configurable audio node that handles all console functions as well as IP audio networking. Audio mixing, routing and processing along with 24 mix-minus busses are all contained in a single fanless, convection cooled two rack unit enclosure. Users can mix and match analog and digital I/O cards to create the ideal combination of sources and destinations including mics, CD players, studio monitors and more. Incorporating Logitek's JetNet network conduit, the JetStream permits direct network transfer of audio from hard disk playout systems and other Logitek JetNet partners without the use of sound cards.

The space-saving **Remora** console offers the most popular features of other Logitek control surfaces in a compact design that can be set on a table and then moved out of the way when not needed. The Remora is available in four different configurations from 4 to 22 faders, and may be used in both traditional and split configurations. Meters are built into the raised display panels; Logitek's vScreen software application is also available which allows the user to populate a VGA screen with meter banks, router controls and other information.

About Logitek

Founded in 1979, Logitek Electronic Systems, Inc. designs and manufactures digital audio console, routing, switching and metering products for the broadcast and professional audio industries. Logitek Networked Console Systems are used in radio and television facilities worldwide. Full product information is available at the company's website: www.logitekaudio.com.
